Subject NEPA memo re Downers Grove water project

Tom,

As I mentioned in my voice mail message earlier today, the Water Division has a grant application from DuPage County Dept. of Public Works for a Congressional earmark of \$433,000 for a portion of the project to provide public water supply to homes in the Downers Grove area whose wells are contaminated from the Ellsworth Industrial Park Superfund site. Because the construction work is almost finished, there is no need for my program to conduct an environmental review under NEPA. Normally, NEPA compliance is one of the steps in the processing of Congressional earmarks for water and wastewater infrastructure grants. In the attached draft memo to close out the NEPA process for this project, I describe the construction work being done. I want to make sure, by checking with you as the case attorney on Ellsworth, that I've described the project correctly. Let me know if any changes to the memo are warranted. Thanks.
